Hi Team,
I am glad to inform you that I have been listed among the 334 contributors under the Angular CLI project.

During the implementation of GDPR B2C data access portal, we were facing a challenge related to locale support. After digging into it I found that it is an issue/missing feature in Angular CLI.

As Angular is an **open source** project I took it to the maintainers/contributors.

I have reported an issue in Angular's compilation process and after digging into it, I have provided a solution for the same.
The fix has been treated as a **missing feature** in build process and maintainers have accepted the pull request for the fix.

The changes have been merged in master branch and the feature will be part of Angular's next release, i.e. 6.0.X .

Regards
