AWARD MESSAGE

The DEG leadership team would like to take this opportunity to recognize Rahul Bhooteshwar for the initiative he took to identify an issue with Angular and contribute with a solution for the issue to the Angular CLI community repository. While working on the GDPR Data Access portal initiative, the team faced a problem with the Angular framework not supporting translation and registering the application with custom locale ID. This was a blocker for the GDPR effort to proceed as the project dealt with legacy applications that used old locale IDs and the builds for those failed due to this framework limitation. Rahul evaluated the scenarios, devised as solution and contributed by adding new feature in Angular framework's Internationalization process to support custom locale IDs. This contribution will enable the Angular community worldwide to build projects using locale ids of their choice. The issue has been has been treated as a missing feature in build process and framework maintainers have accepted the fix provided after review and merged in master branch. This new feature will be part of Angular Release 6.0.X. Congratulations Rahul on this commendable accomplishment and also thank you for your passion to learn and share knowledge not just within the organization but also extending your learning to external worldwide Angular fraternity. You have made us proud!!
